

VoxIP JUST GOT BIGGER!

NuVox VoxIP service can now be delivered in high bandwidth increments of 10, 20, 50, and 100Mbps. Enjoy the same features, quality, and reliability you've come to know and expect from VoxIP, but now with speed options that support today's high bandwidth applications. Through the use of T1s and newer access technologies, NuVox can deliver dynamic voice and data applications from speeds of 1.5Mbps all the way up to 100Mbps.

Features of VoxIP:

- ▶ **Flexibility.** VoxIP provides your business a combination of voice, internet and networking services.
- ▶ **Dual Usage.** Share bandwidth allocation between voice and data.
- ▶ **Voice Prioritization.** Inbound and outbound calls receive priority.
- ▶ **Robust Feature Packages.** Select from feature packages that include free domestic LD and reservationless conferencing as well as local calling features, messaging services, web hosting, email, managed internet security, and much more.

Advantages of VoxIP:

- ▶ **Easy-to-use Customized Portal.** Easily monitor your call logs, store contact information, and update your individual calling features at any time using your personal, company portal.
- ▶ **Free Calling Between Locations.** Receive free domestic LD between VoxIP locations.
- ▶ **Quality of service.** NuVox leverages its state of the art, fully redundant and on premise IAD to ensure the highest quality of service.
